

Empowering Future Tech Innovators: Our STEM Internship Journey

31 August 2026

For the second year of our STEM Internship Program, we were delighted to welcome another group of talented STEM interns to our Strategic Development team, supporting our digital transformation journey through innovation, automation, and data-driven solutions.

From developing POCs and prototype solutions to supporting data analysis and process improvement initiatives, these aspiring innovators took on real business challenges and brought fresh perspectives to our supply chain operations. Their curiosity, creativity, and passion for technology have once again made a meaningful impact on our organization.

Together, let's build a smarter and more connected future.
