

## The APAC ESG Summit for SMEs

4 June 2025

Keith Wong, Top Form Group's Head of Sustainability, was recently invited to participate in a panel discussion on **"Navigating EU Sustainability Compliance: Strategies for HK SMEs"**, held as part of the Summit organized by Federation of Hong Kong Industry.

As ESG compliance becoming an increasingly critical focus worldwide – particularly with new regulations emerging from the European Union – the summit offered a valuable platform for Hong Kong businesses operating across the Asia Pacific Region to collaborate and exchange insights on effective strategies.

During the panel, Keith shared Top Form Group's perspective on practical strategies to embed ESG principles into business models, leveraging innovative product design and technology to build supply chain resilience and enhance competitiveness in the global market.

Top Form Group is inspired by the collective efforts of industry peers to advance sustainability and ESG compliance. We commend FHKI and the HKSAR Government for facilitating this important dialogue and remain committed to promoting sustainable responsible business practices within our industry.
